ABOUT THE WORKSHOP

Microteaching, a teacher training technique currently practiced worldwide, provides teachers an opportunity to perk up their teaching skills by improving the various simple tasks called teaching skills. With the proven success among the novice and seniors, microteaching helps to promote real-time teaching experiences. Today the profession of teaching has become quite challenging. Teachers are expected to be both effective teachers and researchers. Being an educator is not just about sharing knowledge; it is about making sure that learners truly integrate this knowledge and derive learning out of it. Any teaching that does not result in effective learning is useless. Therefore, to be an effective teacher, one needs to be able to develop expertise in Micro Teaching Skills and continuously upgrade himself/herself by engaging in research. After Workshop pupil teachers will be able to: Familiarize prospective teachers about the importance of micro teaching in instruction, Analyze the different components of micro teaching skills and its applications, Gain self-confidence among prospective teachers by scaling down all complexities of actual classroom situations, Practice micro teaching to develop core teaching skills for effective classroom teaching, Make use of the academic potential of the teacher trainee by providing much needed feedback, Acquire the ability to integrate the micro teaching skills in normal classroom teaching. The program also caters to the United Nations Sustainable Development Goals (SDG) 4 and 9.

ELIGIBILITY: Students from Faculty of Education can apply for the program. However, PG students of other departments, Research Scholars, Faculty Members and School Teachers with an ambition to explore these fascinating areas of Teaching-Learning, Interaction are also welcome.

CERTIFICATE: It is mandatory to attend all the sessions and complete required assignments to get hard copy of the Certificate.
