10. Outcomes of the Kisan Goshthi (In Brief):

- ✓ Enhanced awareness among women farmers about their role in agriculture
- ✓ Improved understanding of scientific farming and livestock practices
- ✓ Increased interest in entrepreneurship and SHG formation
- ✓ Strengthened farmer–scientist interaction

11. Constraints Identified:

- ✓ Limited awareness of modern technologies
- ✓ Poor access to institutional credit and inputs
- ✓ Lack of market linkages
- ✓ Low participation in decision-making

12. Suggestions / Recommendations:

- ✓ Regular training and awareness programmes for women farmers
- ✓ Strengthening SHGs and farmer groups
- ✓ Improved access to credit, inputs, and markets
- ✓ Promotion of integrated farming systems

13. Conclusion:

The Kisan Goshthi was successfully conducted and proved to be highly beneficial for farmers, especially women participants. It enhanced awareness regarding their role in agriculture and encouraged adoption of improved farming practices and entrepreneurial activities. The programme strengthened the linkage between the university and rural community and emphasized the importance of inclusive agricultural development.
