Projects

ContractVerse, Smart Contract Website Development Project

2023

Guide: Dr. Syed Anas Ansar

Role: Developer

As a developer, I contributed to the development of a smart contract website project. The project aimed to create a secure, decentralized platform for executing smart contracts using blockchain technology.

My responsibilities included:

- Introducing and Presenting the project to jury members,
- Developed smart contract code using Solidity, implemented web3.js, and designed the user interface using React.js and CSS.

Certificates

- SEO
- Full Stack Developer (MERN)
