

Report on Training Program: Hands on Skill Development

organized by the Faculty of Pharmacy

from 23rd - 30th Apr 2019

The first session of 7 day short term training program entitled “Hands on skill development” was successfully held at faculty of pharmacy from 23rd April to 30th April 2019 with 7 registered participants who were M.Pharm. students of other institute. The training program was to enhance the scientific skills and practical approach of young researchers on HPLC (Gradient & Isocratic) and UV spectrophotometer along with training in varied phytochemical processes, basics of nanoformulations, literature surveying and selection of animal screening model was also given. Training certificates were awarded to the participants who had successfully completed the training program and submitted their training reports. The positive feedback from the trainees reflected that the purpose of training was successfully accomplished.
