DEPARTMENT OF COMMERCE AND BUSINESS MANAGEMENT
INTEGRAL UNIVERSITY, LUCKNOW

REPORT

Date: 23. 03.2018

Department of Commerce & Business Management has successfully organised one day seminar under the theme “Industry Academia Innovative Practices on the topic “Lean Six Sigma” by Mr.Adeelshamsi, Senior Consultant, Tata Consultancy Services, Lucknow on 17.03.2018 at 10:00 AM in Seminar Hall, Third Floor, BNLT Building.

The one day seminar provided enriched experience to all the participants students as well as faculties because the topic was so interesting and philosophical which focussed on scientific techniques and ways to reduce errors and improve productivity around the workplace.

The speaker of the seminar Mr.AdeelShamsi, has enlightened the participants with his great communication and technical skills.He also conducted various learning exercises which made the event more interesting where one could assess and evaluate the individual performances. Mr.Adeeladdresses the participants by emphasising on significance of the Lean Six Sigma by following points:

He quoted: 'A fool with a tool is still a fool' as the age-old adage goes!

Lean Six Sigma offers a methodology and a set of tools that lead to continuous improvement. In a well-embedded Lean Six Sigma culture, from the voice of the customer to measuring delivery success, what gets measured gets improved. Some common traps that most organizations fall into are -

- Focus on theoretical knowledge than application
- Lack of focus on resource optimization than utilization
- Focus on data collection without driving business intelligence
- Use of static and traditional execution approaches to new-age dynamic ones
- Lack of alignment between organization mission/vision and individual goals.

All the participants felt great to attend such an event full of insights, learning and examples.

Final Takeaway of the event:

In a nutshell, Lean methodology aims at waste reduction in process, while six sigma aims at reduction of process variation to realize the full potential for process improvements. An integrated approach of lean six sigma helps improving process efficiency, optimizing resources, and increasing employees' satisfaction while improving profits and curtailing cost.
