

World Hand Wash Day-2020

Report on various events conducted by Faculty of Pharmacy, Integral University

On the occasion of **World Hand wash Day-2020**, an **e-Quiz** was organized by **Faculty of Pharmacy**, Integral University, Lucknow, for all the students. The purpose of the quiz was to spread awareness about hand hygiene. The event received overwhelming response, and 332 students submitted their response before the timed quiz was closed. A brief insight in the participant details is here under:

Course

332 responses

Which is not a component of WHO's handrub formulation

91 / 324 correct responses

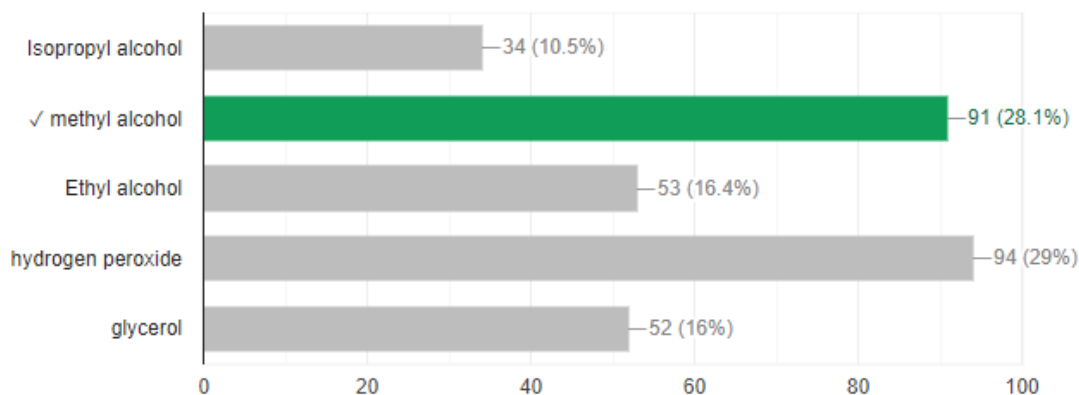

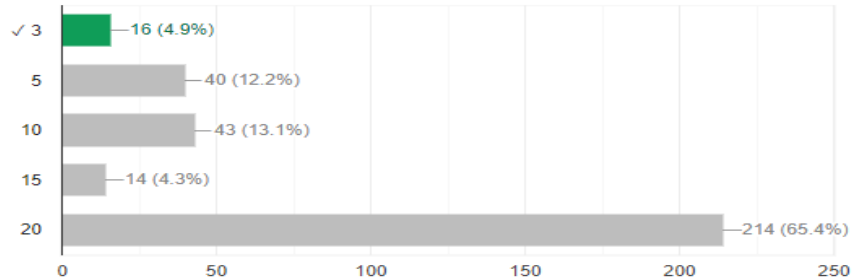

Chart above indicates that pharmacy students should be made aware of types and composition of hand wash and sanitizers to make them better professionals.

What is the minimum (time in seconds) you should take for cleaning hands with alcohol based sanitizer

16 / 327 correct responses

On this occasion a webinar was also organized on “Hand Hygiene for All”. The event was conducted on Google Meet in between 10:30-11:30 AM. Around hundred students and faculty members participated in the webinar.

Dr. Abdul Hafeez, Associate Professor (Jr.), Faculty of Pharmacy, Integral University discussed the different aspects of hand hygiene. He explained WHO techniques of handwash and handrub. He emphasized on importance of hand hygiene in prevention and control of different diseases. He also discussed different ways for celebration of Global Hand washing Day.

The screenshot shows a mobile interface for a Google Meet webinar. At the top, there are navigation icons (back, forward, refresh, mute) and status icons (alarm, 4G LTE, signal strength, battery, and time 10:31). The main content area features the Integral University logo with the tagline 'INSPIRING EXCELLENCE' on the left. In the center, a banner reads 'GLOBAL HANDWASHING DAY OCTOBER 15, 2020'. On the right is a medical cross logo with 'I.U.' and 'FOR' text. Below the banner is a large graphic of a hand made of dots with the text 'CLEAN CARE FOR ALL IT'S IN YOUR HANDS' and hashtags #HandHygiene, #InfectionPrevention, and #HealthForAll. To the right of this graphic is a box with the text 'HAND HYGIENE FOR ALL'. At the bottom right is a box with the name and title of the speaker: 'Dr. Abdul Hafeez Associate Professor (J) Faculty of Pharmacy Integral University'. The bottom of the screen shows a navigation bar with a person icon and '(66)', a chat icon, and an information icon.

WHY HAND HYGIENE?

(3) TO PREPARE FOR FUTURE

- Hand hygiene is key to stopping the spread of COVID-19 now
- Investments now will also prepare us better for any future disease

FACTS:

- Handwashing can reduce diarrheal diseases by 30% to 48%.
- Handwashing can reduce acute respiratory infections by 20%.
- Handwashing can reduce the transmission of pandemic-related pathogens such as cholera, Ebola, SARS and hepatitis E
- Hand hygiene is protective against healthcare-associated infections
