Dear Departmental Placement Coordinator

Sir,

Please find attached herewith Monthly activity plan as required

With reference to UGC's directive on creating awareness about the ill effects of fireworks and upkeep of clean environment, the department of Environmental Science is organizing lectures/presentations on awareness of Environmental issues in schools/colleges in neighboring areas of our University, along with the N.S.S. camp scheduled from 18th - 24th February 2018. In this connection our faculty members have been deputed to deliver the lectures/presentations on the topic "**ill-effects of fireworks.**"

We know that smoke from fireworks consisting of many particulate matter enters in to our lungs which may be carcinogenic and destroys the respiratory system. This is for awareness of everyone.

Regards,

Riyazuddeen Khan, Ph.D. ++
