Dear All,

With reference to UGC's directive on creating awareness about the ill effects of fireworks and upkeep of clean environment, the department of Environmental Science is organizing lectures/presentations on awareness of Environmental issues in schools/colleges in neighbouring areas of our University, along with the N.S.S. camp scheduled from 15th - 21st January 2016. In this connection six faculty members have been deputed to deliver the lectures/presentations on the topic "**ill-effects of fireworks.**"

Faculty from Dept. of Env. Science	Faculty from Polytechnic
Mr. Md. Usama	Mr. Aquib Khan
Mrs. Amina Jafri	Mr. Adarsh Mishra
Mrs. Rahila Rahman Khan	Mr. Abid Shakeel

We know that smoke from fireworks consisting of many particulate matter enters in to our lungs which may be carcinogenic and destroys the respiratory system. This is for awareness of everyone.
