Brief Report on “Plastic Free Awareness Campaign” organized by Department of Environmental Science at Bhakhamau Village, Bakshi Ka Talab

The **Department of Environmental Science**, Faculty of Science organized a “**Plastic Free Awareness Campaign**” on 11th Nov 2021 to inform the local communities about the ill-effects of Plastic waste pollution on the Environment and Human health. In view of the above, a visit was made to Bhakhamau village, Bakshi Ka Talab near Lucknow for the furtherance of the campaign to aware the nearby primary school students of Bhakhamau village about the negative implications of plastic waste pollution on the environment and human health, and how everyday actions are taken with right awareness can lessen the recurring problems of plastic pollution. This awareness program was flagged off by Prof. M. A. Khalid, Head of, Department of Environmental Science, who encouraged all the UG and PG students of the department along with faculty members to undertake this awareness campaign at Bhakhamau village, Bakshi Ka Talab. All the faculty members of Environmental Science enthusiastically participated in this visit along with the students of the department. Students and faculty members delivered informative talks and interacted with the village school students, thereby spreading awareness about plastics and their impacts and ways to reduce them. Reuse and Recycling is not the only effective solution to plastic pollution, but one has to avoid the use of plastic wherever possible. This program of the Department of Environmental Science, Integral University is a small step towards “**Empowering people to make a difference**” by spreading awareness among the local communities.
