

Report on Site Visit of B. Tech Civil Engineering final year students to Gordon site of M/s MI Group Near Ikana Stadium, Shaheed Path, Lucknow on 30th August 2024

Department of Civil Engineering, Integral University, organized a site visit to Gordon Project of M/s MI Group, Near Ikana Stadium, Shaheed Path, Lucknow on 30th August 2024 for third and final year students. The visit was led by Mr. Anwar Ahmad, Associate Professor and Mr. Vikash Singh, Assistant Professor, Department of Civil Engineering, Integral University.

Er. Sharib Asad, Project Manager introductory briefing about the ongoing project

Upon arrival, the students were warmly welcomed by Er. Sharib Asad, Project Manager at M/s MI Group, who provided an introductory briefing about the ongoing project. Following this, the project staff elaborated on various civil engineering activities at the site, including different types of shuttering, the method of brickbat Coba waterproofing, reinforcement work, and the construction of RCC columns and beams.

Anwar Ahmad, Associate Professor, briefed the students on the project

Anwar Ahmad, Associate Professor, explained the project details to the students

The architectural design of the building, particularly the elliptical shape, was also discussed, with explanations provided regarding the aesthetic and structural reasoning behind it. Additionally, the staff gave insights into the project's cost management and how bar charts are used for project monitoring.

Students were further engaged by marketing personnel, who shared details about customer concerns and how the company ensures compliance with their requirements.

The visit was well-received by the students, who actively participated and demonstrated great discipline throughout the tour. A total of 41 students attended the visit, gaining invaluable practical knowledge to complement their theoretical studies.

A discussion was held with the MI group representative
