Brief report on Animal Health Camp organized by Department of Agriculture, IIAST, Integral University Lucknow in Rajauli Village on 10th October 2024

Animal healthcare camps play a crucial role in enhancing livestock health, which in turn boosts agricultural productivity and strengthens rural livelihoods. These camps offer preventive care, vaccinations, and disease management, helping to control outbreaks and lower mortality rates. They also educate farmers regarding nutrition and hygiene and livestock's to ensure animals receive necessary medical care as required. In accordance with it an Animal Health Camp was successfully organized at Rajauli Village by the Department of Agriculture, IIAST, Integral University, Lucknow on 10th October 2024.

The camp was held with the objective of improving livestock health in nearby villages by providing essential veterinary services such as deworming, nutritional advice and treatment for sick animals. Livestock owners and Farmers participated in the camp bringing 57 animals, including cows, buffaloes and goats of various age groups. The services provided in the camp included deworming for animals to protect them from parasitic infections. In addition, the farmers were given tailored nutritional advice to ensure balanced diets for their livestock, particularly dairy animals, to enhance milk production. Sick animals were treated for specific health issues and farmers were educated on disease prevention and the early detection of common livestock illnesses. The camp also served as an educational platform, where students of B. Sc. (Hons.) Agriculture 2nd year assisted in both the administration of treatments and the dissemination of practical livestock management knowledge. The farmers showcased a strong interest in learning about proper feeding practices and disease management indicating the need for continuous educational support.

The Animal Health Camp was organized under the guidance of Prof. Mohd Haris Siddiqui, Director, Integral Institute of Agricultural Science & Technology and Prof. Saba Siddiqui, Head, Department of Agriculture, Integral Institute of Agricultural Science & Technology. The camp was led by Dr. Zeeshan Ahmed Khan, Dr. Muzeev Ahmad and Mr. Faisal Kirmani, with the active involvement of students from the department. The farmers expressed their gratitude for the services provided, particularly the deworming and nutritional guidance, which they found highly beneficial. They also suggested that similar camps be organized more frequently to cover additional services such as vaccinations and advanced treatments. Faculty members, students, and farmers actively engaged in the event, and there is strong encouragement for organizing more such camps in the future to further enhance livestock health and farmer education.
