Brief report on Animal Health Camp organized by Department of Agriculture, IIAST, Integral University Lucknow in Achramau Village on 24th October 2024

The Department of Agriculture, IIAST, Integral University, Lucknow, successfully organized an Animal Health Camp on October 24, 2024, in Achramau Village. Animal health camps provide vital preventive care, vaccinations, and disease management, helping to control outbreaks and reduce animal mortality. They also educate farmers on livestock nutrition and hygiene, ensuring animals receive appropriate medical attention when needed.

The camp aimed to improve livestock health in nearby villages by offering essential veterinary services such as deworming, nutritional guidance, and treatment for sick animals. Sick animals received specific treatments, and farmers were educated on disease prevention and early detection of common livestock illnesses. Farmers and livestock owners participated enthusiastically, bringing 60 animals, including cows, buffaloes, and goats of various ages. Services provided included deworming to protect animals from parasitic infections, along with tailored nutritional advice to promote balanced diets, especially for dairy animals, to boost milk production. The camp also served as a practical learning platform for B.Sc. (Hons.) Agriculture 3rd-year students, who assisted in administering treatments and shared hands-on livestock management practices with the farmers. Farmers showed keen interest in learning about proper feeding and disease management, indicating the importance of ongoing educational support.

The event was organized under the guidance of Prof. Mohd Haris Siddiqui, Director of IIAST, and Prof. Saba Siddiqui, Head of the Department of Agriculture. It was led by Dr. Zeeshan Ahmed Khan, Dr. Abdul Majeed, and Mr. Faisal Kirmani, with active participation from students. The farmers expressed gratitude for the services provided, particularly the deworming and nutritional advice, and suggested more frequent camps to include additional services like vaccinations and advanced treatments. Faculty members, students, and farmers actively participated, highlighting the value of organizing similar camps in the future to further improve livestock health and farmer knowledge.
