Report on  
Expert Lecture  
“Sustainability of Nature”  
(Under the Aegis of Students Induction Programme, Deeksharambh)

Organized by: Department of Chemistry

Sustainability defines the functioning of natural systems, their diversity and ecological balance. The concept of sustainability also promotes the adaptation of resources and practices by human beings which are eco-friendly and non-hazardous. To promote sustainability among first-year students, the Department of Chemistry organised an expert lecture on “Sustainability of Nature” on 1<sup>st</sup> August 2024 in D113 at 10:45 am. The expert speaker was **Prof. Dhruv Sen Singh**, Head Department of Geology, University of Lucknow, Lucknow. The lecture was also aligned with the **SDGs 13 (Climate Action) and 15 (Life on Land)**. The informative lecture was about how nature refers to the capacity of Earth's natural systems to maintain their health, integrity, and resilience over time. Prof. Singh elaborated on some practices which can be adopted in daily life for sustainable development. The lecture was attended by 65 people, including faculty members and students.

Glimpses of the lecture

Respectfully Submitted by:

Prof. Abdur Rahman Khan

Head, Department of Chemistry  
Department of Chemistry  
Integral University, Lucknow
