Year – II, Semester – III

** A non credit foundation course, Candidate has to pass the course be securing at least 50% marks up to second semester.

L – Lecture; T – Tutorial; P – Practical; C – Credits; CT – Class Tests; TA – Teacher Assessment Continuous Assessment (CA) = Class Tests + Teacher Assessment

Subject Total = Continuous Assessment (CA) + End Semester Examination (ESE)

DC – Departmental Core **DE** – Departmental Elective

ESA – Engineering Science & Art (Foundation Course & Engineering Courses)

Departmental Elective - II

- CE211 Concrete Technology
- CE261 Concreting Techniques and Practices*

*Courses offered by L&T EduTech

| Year | II | Semester | III | 3 | 1 | 0 | 4 | | | |
| Pre-Requisite | NIL | Co-requisite | NIL | | | | | | | |
| Course Objectives The main objective of this course is to understand the basics of the fluid mechanics such as fluid and flow properties, fluid behavior at rest and in motion and fundamental equations like mass, energy and momentum conservation of the fluid flow. | | | | | | | | | | |

| | Course Outcomes |
|-----|--|
| CO1 | Students are able to understand basic concept of properties of fluid and its properties. |
| CO2 | Students are able to understand the Kinematics and Dynamics of Fluid and its application. |
| CO3 | To understand the concept of fluid measurement, types of flows and dimensional analysis. |
| CO4 | To determine the losses in a flow system, flow through pipes, boundary layer flow and flow past immersed bodies. |
| CO5 | Students are able to understand the concept of turbulent flow in in pipe and its nature. |

| Unit No. | Title of the Unit | Content of Unit | Contact Hrs. | Mapped CO |
|-------------|--|---|-----------------|--------------|
| 1 | Introduction &Fluid Statics | Introduction: Fluid Statics Fluid and continuum, physical properties of fluids, ideal and real fluids, Newtonian and NonNewtonian fluids, measurement of surface tension. Fluid Statics: Pressure-density-height relationship, measurement of pressure, manometers, pressure on plane and curved surfaces, centre of pressure, buoyancy, stability of immersed and floating bodies, fluid masses subjected to uniform acceleration. | 08 | CO1 |
| 2 | Kinematics & Dynamics ofFluid Flow | Kinematics of Fluid Flow: Types of fluid flow, streamlines, streak lines, and path lines, continuity equation, rotation and circulation, elementary explanation of stream function and velocity potential. Dynamics of Fluid Mechanics: Euler's equation of motion along a streamline, Bernoulli's equation from Euler's equation. Application of Bernoulli's equation, Pitot Tube, Venturimeter, Orifice meter, free and forced vortex flow, momentum equation and its application to stationary and moving vanes, pipe bends, and combined application of energy and momentum equations, determination of Cv, Cc and Cd. | 08 | CO2 |
| 3 | Dimensional Analysis & Laminar Flow | Dimensional Analysis and Hydraulic Similitude: Dimensional analysis, Buckingham's π theorem, important dimensional numbers and their significance, similitude, similarity laws, geometric, Kinematics and dynamic similarity, model studies. Laminar Flow : Equation of motion for laminar flow through pipes, Stoke's Law, flow between parallel plates, flow through porous media, Fluidization, measurement of viscosity. | 08 | CO3 |
| 4 | Turbulent Flow & Boundary Layer Analysis | Turbulent Flow : Transition from laminar to turbulent flow, equation for turbulent flow, eddy viscosity, mixing length concept and velocity distribution in turbulent flow, Hot-wire anemometer and LDA. Boundary Layer Analysis: Boundary layer thicknesses, boundary layer over a flat plate, laminar boundary layer, turbulent boundary layer, laminar sub-layer, smooth and rough boundaries, local and average friction coefficient, separation of boundary layer and its control, measurement of shear. | 08 | CO4 |
| 5 | Flow Past Submerged Bodies & Pipe | Flow Past Submerged Bodies: Drag and lift, drag on sphere, Cylinder and disc, lift, Magnus effect and circulation. Pipe Flow: Nature of turbulent flow in pipes, equation for velocity distribution over smooth and rough surfaces, resistance coefficient and its variation, flow in sudden expansion, contraction, bends, and siphons, concept of equivalent length, branched pipes, pipes in series and parallel. Compressibility Effects in Pipe Flow: Transmission of pressure waves in rigid and elastic pipes; Water hammer. | 08 | C05 |

| Course Objectives | surveyir To learn area. | ng instruments. about the process of establis | neasurements of distances, directions and elevations by n shment of horizontal control points necessary for carrying parations of topographical maps of the areas. | | | | |

| | Course Outcomes | | | | | |
|-----|--|--|--|--|--|--|
| CO1 | The students have the ability to understand the measurement techniques and equipment used in land surveying. | | | | | |
| CO2 | The students have the ability to take angular measurement from compass and correct them from different errors. | | | | | |
| CO3 | The students have an ability to calculate the linear measurement and area of the land. | | | | | |
| CO4 | The students will Gain the ability to measure differences in elevation | | | | | |
| CO5 | The students will be able to represent the topography of the land graphically. | | | | | |

| Unit No. | Title of the Unit | Content of Unit | Contact Hrs. | Mapped CO |
|-------------|--|---|-----------------|--------------|
| 1 | Introduction to Basic Surveying | Introduction: Importance of surveying to Engineers- Examples from different branches; plane and Geodetic Surveying, Control points, Classification of surveys, Methods of location a point, , principles of surveying, Conventional signs, Surveying instruments, their care and adjustment. Measurement of Distances: Measurement by chain and tape. Source of errors and precautions, Corrections to tape measurements, Field problems, Use and adjustment of auxiliary instruments, Modern trends EDM and Total Station | 08 | 1 |
| 2 | Measurement of Angles and Bearings | Measurement of Angles and Directions: Reference meridians and Bearings, Magnetic declination and its variations. Use of prismatic and surveyor compass, local attraction, Vernier and microptic theodolites, Temporary and permanent adjustments, Requirements of nonadjustable parts, Measurement of horizontal and vertical angles by different methods. | 08 | 2 |
| 3 | Traversing and Tachometry | Traversing: Principles of traversing by compass and theodolite, Field work and checks, Computation of coordinates, Sources of errors, precision of traversing, checking and adjusting of traverses, Omitted measurements. Tachometry: Definitions, principles of stadia systems, Instrument constants Substance and Tangential system, Construction and use of Reduction Tachometers, Range Finders, Errors and precision. Measurement of Elevations: Different methods of determining elevations: Spirit, | 08 | 3 |
| 4 | Levelling | 08 | 4 | |
| 5 | Contouring and Sheet | Contouring: Definition and characteristics of contours, contour interval, Use of contour maps, storage capacity of reservoir, direct and Indirect methods of contouring. Sheet Numbering System : CIM and I and A.C series, Scales and Numbering of Indian Topographic maps | 08 | 5 |

| Course Objectives | To for To fan To introduction | m bending moment equation niliarize with strain energy a roduce methods in order to o g columns. | reloped in structural members including their materials p as, shear force equations and bending stress diagram for a nd the theories of failure. calculate the deflections and rotations of a determinant b ccess the stress and strain developed in cylindrical and sp | a dete | rmina and t | oucklin | |

| | Course Outcomes |
|-----|---|
| CO1 | In-depth understanding of stress strain relationship and of various properties for different materials with ability to calculate stress- strain for different structural members subjected to given loading conditions. |
| CO2 | Interpretation of bending moments, shear forces and bending stresses for determinant beams under different loading and support conditions. Be able to analyze the effects of torsion on shafts. |
| CO3 | Insight of strain energy in a structural element subjected to various types of forces and understanding of different failure theories. |
| CO4 | Ability to calculate the deflections and rotations of a beam under given loading and support conditions and be able to comprehend the buckling loads of a long column according to its support conditions. |
| CO5 | Ability to analyze the stresses and strains associated with thin- thick wall cylindrical and spherical pressure vessels. |

| Unit No. | Title of the Unit | Content of Unit | Contact Hrs. | Mapped CO | | | | |
|-------------|--|--|-----------------|--------------|--|--|--|--|
| 1 | Stress - Strain | Stress and Strain: Concept of stress and strain relationship, Ductility, Toughness, Elastic constants, Hardness, Brittleness, Tension, Compression, Shear, and Elongation, Concept of thermal stresses [5] Principal stresses: Stress transformation, Application of Mohr's circle in stress analysis [3] | 08 | CO1 | | | | |
| 2 | Bending & Torsion Theory | Theory Torsion of Shafts: Torsion of circular shaft, power transmitted by shaft, combined bending and torsion in shafts. [3] | | | | | | |
| 3 | Strain Energy and Theories of Failure | Strain Energy and Impact Loading: Concept of strain energy or resilience, Strain energy in simple tension and compression, Stress due to different types of loading. [4] Theories of Failure: Maximum principal stress theory, Maximum shear stress theory, Maximum principal strain theory, Strain energy theory, Shear strain energy theory and their comparison.[4] | 08 | CO3 | | | | |
| 4 | Slope & Deflection and Compression Members | 08 | CO4 | | | | | |
| 5 | Thin and Thick Cylinder | Thin Cylinders: Theory of thin cylinders subjected to pressure, expression for hoop stress and longitudinal stress, Design of thin cylinders, Thin walled pressure vessels and uniform torsion. [4] Thick Cylinders and Spherical Shells: Stresses and strain in thick shells/cylinder subjected to pressures, compound cylinders press fits on solid shaft.[4] | 08 | CO5 | | | | |

| | Course Outcomes | | | | | | | | | | |
|-----|--|--|--|--|--|--|--|--|--|--|--|
| CO1 | Learner should be able to describe soil properties, relate index properties and able to classify soil. | | | | | | | | | | |
| CO2 | Learner should be able to assess the permeability and formulate effective stress for different conditions. | | | | | | | | | | |
| CO3 | Leaner should be able to compute stress in soil under different loading condition. | | | | | | | | | | |
| CO4 | Leaner should be able to interpret compaction and consolidation characteristics of different soil and their application. | | | | | | | | | | |
| CO5 | Leaner should be able to evaluate shear strength of soil. | | | | | | | | | | |

| Unit No. | Title of the Unit | Content of Unit | Contact Hrs. | Mapped CO |
|-------------|---|---|-----------------|--------------|
| 1 | Introduction to Soil and Index Properties | Engineering Geology of Soil and its formation, Preliminary definitions of Soil Properties, phase diagram, inter-relationship, Index properties of Soil. Classification of Soils: Classification of soil systems – Particle size classification, Textural classification, AASHTO classification, Unified soil classification and Indian soil classification. | 08 | CO1 |
| 2 | Permeability in Soil | Soil Water: Types of soil water, Capillarity in soils, Permeability of soils, Darcy's law, Determination of permeability of soils, Permeability of stratified soils, Seepage velocity, flow net, Absolute coefficient of permeability, Factors affecting permeability, Effective stress principle- Effective stress under different field conditions- Seepage pressure-Quick sand condition. | 08 | CO2 |
| 3 | Stresses in Soil | Stresses in soils: Normal and shear Stresses on a plane, Stresses due to applied loads, Boussinesq's solution for a point load, line load, strip load, uniformly loaded circular and rectangular areas, Isobar and pressure bulb concept, stress distribution on horizontal and vertical planes, Newmark's chart and its application, contact pressure. | 08 | CO3 |
| 4 | Compaction and Consolidation | Soil structure. Compaction of soil – Theory of compaction, laboratory compaction tests, optimum moisture content and zero air void line, Field methods and compaction control. Compressibility and Consolidation: Virgin compression curve, Normal and Over Consolidated soils, Over Consolidation Ratio, Terzaghi's one dimensional consolidation theory, Laboratory consolidation test. Determination of coefficient of consolidation by log of time fitting and square root of time fitting methods, Consolidation settlement. | 08 | CO4 |
| 5 | Shear Strength | Introduction of Shear Strength of Soil: State of stress at a point, Mohr's stress circle. Shear strength of soil. Mohr-Coulomb failures envelop. Direct, Triaxial, Unconfined and Vane shear tests, principles of drained and undrained tests, Strength of loose and dense sands, pore pressures. | 08 | CO5 |

Effective from Session: 2024-25 Title of the Course **Environmental Studies Course Code** ES101 L Т Р С II 3 0 4 Year Semester III 1 **Pre-Requisite** _____ **Co-requisite** _____ The objectives of environmental studies are: (a) Creating awareness about environmental problems among people. (b) Imparting basic knowledge about the environment and its allied problems. The importance of environmental science and environmental studies cannot be disputed. The need for sustainable development is a key to the future of mankind. **Course Objectives** Continuing problems of pollution, loss of forget, solid waste disposal, degradation of the environment, issues like economic productivity and national security, Global warming, the depletion of the ozone layer and loss of biodiversity have made everyone aware of environmental issues.

| | Course Outcomes |
|-----|--|
| CO1 | Gain in-depth knowledge on natural processes and resources that sustain life and govern the economy. |
| CO2 | Understand the consequences of human actions on the web of life, global economy, and quality of human life. |
| CO3 | Acquire values and attitudes towards understanding complex environmental- economic-social challenges, and active participation in solving current environmental problems and preventing the future ones. |
| CO4 | Aware students about problems of environmental pollution, its impact on humans and ecosystems and control measures. |
| CO5 | Adopt sustainability as a practice in life, society, and industry. |

| Unit No. | Title of the Unit | Content of Unit | Contact Hrs. | Mapped CO |

| 1 | Humans and the Environment | The man-environment interaction: Humans as hunter-gatherers; Mastery of fire; Origin of agriculture; Emergence of city-states; Great ancient civilizations and the environment; Middle Ages and Renaissance; Industrial revolution and its impact on the environment; Population growth and natural resource exploitation; Global environmental change. The emergence of environmentalism: Anthropocentric and eco-centric perspectives (Major thinkers). | 04 | CO1 |
| 2 | Natural Resources and Sustainable Development | Overview of natural resources: Definition of resource; Classification of natural resources- biotic and abiotic, renewable and non-renewable. Microbes as a resource; Status and challenges. Water resources: Types of water resources- fresh water and marine resources; Availability and use of water resources; Environmental impact of over-exploitation, issues and challenges; Water scarcity and stress; Conflicts over water. Soil and mineral resources: Important minerals; Mineral exploitation; Environmental problems due to extraction of minerals and use; Soil as a resource and its degradation. Energy resources: Sources of energy and their classification, Implications of energy use on the environment. Introduction to sustainable development: Sustainable Development Goals (SDGs)- targets and indicators, challenges and strategies for SDGs. | 06 | CO2 |
| 3 | Conservation of Biodiversity and Ecosystems | Biodiversity as a natural resource; Levels and types of biodiversity; Biodiversity in India and the world; Biodiversity hotspots. Major ecosystem types in India and their basic characteristics; Ecosystem services classification and their significance. Threats to biodiversity and ecosystems, Major conservation policies: in-situ and ex-situ conservation approaches; National and International Instruments for biodiversity conservation; the role of traditional knowledge, community-based conservation; Gender and conservation. | 06 | CO3 |
| 4 | Environmental Pollution and Health | Understanding pollution: Production processes and generation of wastes; Assimilative capacity of the environment; Definition of pollution; Point sources and non-point sources of pollution. Air pollution: Sources of air pollution; Primary and secondary pollutants; Indoor air pollution; Adverse health impacts of air pollutants; National Ambient Air Quality Standards. Water pollution: Sources of water pollution; River, lake, and marine pollution, groundwater pollution; Water quality parameters and standards; adverse health impacts of water pollution and solid waste; Solid and hazardous waste; Impact on human health. Noise pollution: Definition; Unit of measurement of noise pollution; Sources of noise pollution; Noise standards; adverse impacts of noise on human health. Thermal and Radioactive pollution: Sources and impact on human health and ecosystems. Definition of pollution; Point sources and non-point sources of pollution. | 07 | CO3, CO4 |
| 5 | Climate Change: Impacts, Adaptation and Mitigation | Observed impacts of climate change on ocean and land systems; Sea level rise, changes in marine and coastal ecosystems; Impacts on forests and natural ecosystems; Impacts on animal species, agriculture, health, urban infrastructure; the concept of vulnerability and its assessment; Adaptation vs. resilience; Climate-resilient development; Indigenous knowledge for adaptation to climate change. Mitigation of climate change: Synergies between adaptation and mitigation measures; Green House Gas (GHG) reduction vs. sink enhancement; Concept of carbon intensity, energy intensity, and carbon neutrality; National and international policy instruments for mitigation, decarbonizing pathways and | 06 | CO4 |

| | | · · · · · · · · · · · · · · · · · · · | | 1 | | | | | | |
|----------|--|--|-------------|--------|--|--|--|--|--|--|
| | | net zero targets for the future; Energy efficiency measures; Renewable energy sources; Carbon capture and storage, National climate action plan and Intended Nationally | | | | | | | | |
| | | Determined Contributions (INDCs); Climate justice. Major International Environmental Agreements: CBD; Cartagena Protocol on Biosafety; | | | | | | | | |
| 6 | Environmental Treaties and Legislation | Nagoya Protocol on Access and Benefit-sharing; CITES; Ramsar Convention; UNCCD; Vienna Convention for the Protection of the Ozone Layer; Montreal Protocol and the Kigali Amendment; Basel Convention; Stockholm Convention; Minamata Convention; UNFCCC; Kyoto Protocol; Paris Agreement; India's status as a party to major conventions. Major Indian Environmental Legislations: The Wild Life (Protection) Act, 1972; The Water (Prevention and Control of Pollution) Act, 1974; The Forest (Conservation) Act, 1980; The Air (Prevention and Control of Pollution) Act, 1981; The Environment (Protection) Act, 1986; The Biological Diversity Act, 2002; The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006; Noise Pollution (Regulation and Control) Rules, 2000; Industry-specific environmental standards; Waste management rules; Ecologically Sensitive Areas; Coastal Regulation Zone; India; National Green Tribunal; Some landmark Supreme Court judgments. Major International organizations and initiatives: UNEP, IUCN, WCED, UNESCO, IPCC, and MAB) program. | | | | | | | | |
| 7 | Case Studies and Field Work | Discussion on one national and one international case study related to the environment and sustainable development. Field visits to identify local/regional environmental issues, make observations including data collection and prepare a brief report. Documentation of campus biodiversity. Campus environmental management activities such as solid waste disposal, water management, and sewage treatment. | 04 | CO5 | | | | | | |

| Pre-Requisite | NIL | Co-requisite | NIL | | | | | | | | | | |
| Course Objectives | To understand concepts related to Concrete technology which involves types and property of concrete | | | | | | | | | | | | |

| | Course Outcomes |
|-----|--|
| CO1 | To understand the manufacturing process of cement and its various properties. |
| CO2 | To learn about various types of cement and test on coarse aggregates. |
| CO3 | To learn about various problems arising while concreting and tests performed on fresh and hardened concrete. |
| CO4 | To learn the procedure of the mix design of concrete as per Indian standard. |
| CO5 | To understand about special concretes. |

| Unit No. | Title of the Unit | Content of Unit | Contact Hrs. | Mapped CO |
|-------------|---|--|-----------------|--------------|
| 1 | Introduction of Cement Concrete | Cement: Manufacture of Portland cement, its composition. Hydration of cement, physical and chemical properties, concept of strength development, Gel space ratio, power's Law, Gel structure [4]. Testing of cement for general physical and chemical properties as per BIS specifications. | 08 | CO1 |
| 2 | Types of Cement | Different types of cement such as Slag cement, Portland Pozzolana cement and high Alumina cement, their characteristics, composition, use and properties, aggregates and testing of aggregates, classification source, physical and mechanical properties. Testing of aggregates for physical and mechanical properties. | 08 | CO2 |
| 3 | Tests on Fresh and Hardened Concrete | Proportioning of concrete, operation involved in concrete production. Workability, factors affecting workability, measurement of workability, problem of segregation, bleeding and Laitance, NDT (Rebound hammer, PUNDIT) methods. | 08 | CO3 |
| 4 | Mix Design | Concrete Mix Design: Principle and methods, Statistical quality control, concrete rheology, maturity concept, IS code method, ACI code method. Admixture in concrete: Introduction, functions, classification, and IS specification. | 08 | CO4 |
| 5 | Special Concrete | Special Concrete: Light weight concrete. High density concrete. Sulphar Impregnated concrete, polymer concrete, lime concrete, constituents and uses. High Strength Concrete, Fibre Reinforced Concrete | 08 | CO5 |

| Pre-Requisite | NIL | Co-requisite | NIL | | | | | | | | | | |
| Course Objectives | concreting ac | tivities at projects. | s used in concrete as relevant Indian standard codes and x design as per the project requirement. | l pract | tical a | ispect | s on | | | | | | |

| | Course Outcomes |
|-----|---|
| CO1 | Students will be able to Design of concrete mix as per requirement of construction project. |
| CO2 | Students will be able to Select and proportionate different materials used in a concrete mix including admixtures. |
| CO3 | Students will be able to evaluate the properties of concrete by conducting test on cement, aggregate and concrete (with & without admixtures) for using the data for Mix design procedures. |
| CO4 | Students will be able to Adopt the best practices in concrete construction from industry's requirement, thumb rules, mitigation of concreting issues at Sites. |
| CO5 | Students will be able to Identify Special Types of Concrete & Challenges faced at Site. |

| Unit No. | Title of the Unit | Content of Unit | Contact Hrs. | Mapped CO |
|-------------|---|---|-----------------|--------------|
| 1 | Introduction to constituent materials of Concrete | Introduction to Concrete, Overview of materials- Cement, Coarse aggregate and Fine aggregate. Cement: Types of Cement, Physical Test on Cement, Lab Test - Consistency Test, Initial and final Setting Time of Cement, Fineness test for Cement, Compressive Strength for Cement. Practical demos of testing. Mineral Admixture: Fly Ash, GGBS, Micro silica / Silica Fume, Metakaolin / Rice Husk Ash, Composite Cement and Ultrafine Materials, Lab Test - Fineness of Fly ash Fine Aggregate and Coarse Aggregate – Properties, Requirements, Lab Tests (Coning and Quartering, Sieve analysis, Silt and Clay, Specific gravity, Water absorption, Dry Loose Bulk Density, Organic Impurities, Moisture content, Flakiness Index, Elongation Index, Impact test, Crushing test, Abrasion test) | 08 | CO1 |
| 2 | Water, Admixtures and Blending of Aggregates | Water and Chemical Admixture: Source, Requirements, Limits and Testing Blending of Aggregate -: Blending of Fine and Coarse Aggregate, gradation for optimization and practical aspects. | 08 | CO2 |
| 3 | Mix Design | Water and Chemical Admixture – Source, Requirements, Limits and Testing Blending of Aggregate - Blending of Fine and Coarse Aggregate, gradation for optimization and practical aspects. | 08 | CO3 |
| 4 | Testing, Production, Finishing, Handling & Curing of Concrete | Test on Concrete: Workability of concrete, Flexural and compressive Strength tests. Production of Concrete-: Batching Plant, Calibration, Mixing and Transportation of concrete Handling of concrete at construction: Placing, Levelling and Compaction. Cold Joints Finishing and Curing and Protection of Concrete | 08 | CO4 |
| 5 | Special Types of Concrete & Challenges faced at Site | Special Types of concrete: Self-Compacting concrete, Mass Concrete, Dry Lean Concrete, Pavement Quality Concrete. Challenges faced at sites: Plastic Shrinkage Cracks, Plastic Settlement, Honey comb, Cold Joint, Bug holes, Cover to Concrete Do's and Don'ts in Concrete Construction. Site Shoot | 08 | CO5 |

|-----|--|
| CO1 | Students will find role of basic properties of soil in simple and complex applications. |
| CO2 | Students will able to analyze soil behavior and its mechanism. |
| CO3 | Students will able to obtain the compressibility, permeability parameters and CBR value of soil. |
| CO4 | Students will able to determine compaction and shear strength parameters of soil. |
| CO5 | Students will learn how to report the results of a laboratory experiment at a professional standard. |

| Unit No. | Title of the Unit | Content of Unit | Contact Hrs. | Mapped CO |
|-------------|-------------------|---|-----------------|--------------|
| 1 | Experiment-1 | Determination of water content of a given moist soil sample by (i) oven drying method, (ii) pycnometer method. | 02 | 1 |
| 2 | Experiment-2 | Determination of specific gravity of a given soil sample by (i) density bottle, (ii) pycnometer method. | 02 | 2 |
| 3 | Experiment-3 | Determination of in situ dry density of soil mass by (i) core-cutter method, (ii) sand replacement method. | 02 | 3 |
| 4 | Experiment-4 | Determination of relative density and grain size distribution of a given soil sample by sieve analysis and sedimentation (hydrometer) analysis. | 02 | 4 |
| 5 | Experiment-5 | Determination of consistency limits (liquid, plastic and shrinkage limits) of the soil sample used in experiment no. 5 (grain-size analysis). | 02 | 5 |
| 6 | Experiment-6 | Determination of compaction characteristics (OMC & MDD) of a given soil sample. | 02 | 6 |
| 7 | Experiment-7 | Determination of permeability of a remolded soil sample by constant head &/or falling head method. | 02 | 7 |
| 8 | Experiment-8 | Determination of consolidation characteristics of a remolded soil sample by an oedometer test. | 02 | 8 |
| 9 | Experiment-9 | Determination of shear strength characteristics of a given soil sample from Tri-axial Shear Test. | 02 | 9 |
| 10 | Experiment-10 | Determination of shear strength characteristics of a given soil sample from Direct Shear Test. | 02 | 10 |

| | Course Outcomes | | | | | | | |
|-----|---|--|--|--|--|--|--|--|
| CO1 | Students will learn basic concept of open channel flow and its types. | | | | | | | |
| CO2 | Students will learn about different equation and their application related to non-uniform flow. | | | | | | | |
| CO3 | Students will learn about basic principle of Gradually Varied flow GVF and its applications. | | | | | | | |
| CO4 | Students will learn about the condition and criteria of flow through hydraulic jump. | | | | | | | |
| CO5 | Students will learn about the Hydraulic machines and there function, application. | | | | | | | |

| Unit No. | Title of the Unit | Content of Unit | Contact Hrs. | Mapped CO | | |
|--|---|--|-----------------|--------------|--|--|
| 1 | Introduction & Uniform Flow | Introduction: Difference between open channel flow and pipe flow, geometrical parameters of a channel, continuity equation. Uniform Flow: Chezy's and Manning's Equations for uniform flow in open channel, velocity distribution, most efficient channel section. | 08 | 1 | | |
| 2 | Energy and Momentum Principles | Energy and Momentum Principles: Critical depth, concept of specific energy and specific force, application of specific energy principle for interpretation of open channel phenomenon, flow through vertical and horizontal contractions | 08 | 2 | | |
| 3 | 3 Non-uniform Flow in Open Channel Non-uniform flow in open channel: Equation of gradually varied flow and its limitations, flow classification and surface profiles, integration of varied flow equation by analytical, graphical and numerical methods, flow in curved channel. | | | | | |
| 4 | 4 Hydraulic Jump & Hydraulic Pumps Argentian A | | | | | |
| 5 | Hydraulic Turbines | Hydraulic Turbines: Introduction, rotodynamic machines, Pelton turbine, equation for jet and roter size, efficiency, spear valve, reaction turbines, Francis and Kaplan type, head on reaction turbine, basic equation for type, head on reaction turbine, basic equation for rotodynamic machines, similarity law and specified speed, cavitations, characteristic curves. | 08 | 5 | | |

| | Course Outcomes |
|-----|--|
| CO1 | The students have the ability to prepare a small scale maps. |
| CO2 | The students have the ability to make control points of long observation and to measure them accurately. |
| CO3 | The students have an ability to calculate the errors and correct them by applying different numerical methods. |
| CO4 | The students will be able to make different types of curves used on highways and railway project. |
| CO5 | The students will be able to tell about the general requirements and specifications of various civil engineering projects. |

| Unit No. | Title of the Unit | Content of Unit | Contact Hrs. | Mapped CO |
|-------------|------------------------------------|---|-----------------|--------------|
| 1 | Plane Table Survey | Principles, advantages and disadvantages, plane table equipment, Use of Telescopic Alidade and Indian Patterns Tangent Clinometer, different methods of plane table surveying, resection- two and three point problem. | 08 | 1 |
| 2 | Triangulation and Trilateration | Introduction, classification of triangulation system, triangulation figures, station marks and signals, intervisibility and height of stations, satellite station, problems on reduction to center, base line measurement and its extension. | 08 | 2 |
| 3 | Theory of Errors | Types of errors, treatment of random errors, Basic terms, laws of weights with examples, Theory of least squares, Rules for giving weights and distribution of errors to the field observations, Determination of the most probable values of quantities by normal equation method & method of differences. | 08 | 3 |
| 4 | Curves | Classification of curves, Elements of simple circular curve, Designation of curve by radius and degree of curves. Method of Setting out simple circular curve by offset from long chord method and Rankine's method of deflection angles. Simple Numerical problems on above topics Transition curve, introduction and advantages superelevation, length of transition curve Vertical curve and its types, sight distance. | 08 | 4 |
| 5 | Project Surveys | General requirements for engineering project surveys, Setting out of building. Hydrographic surveying: Introduction to Hydrographic surveying, Sounding, methods of locating soundings. Special Survey Instruments: Introduction and uses of Electromagnetic Distance Measurement (EDM), Total station, Differential Global Positioning System (DGPS). | 08 | 5 |

Role of Army, Police, Com | sasters | | orpor | ate, |

| | Course Outcomes |
|-----|--|
| CO1 | Students are able to learn types of disasters and its profile in India. |
| CO2 | Students are able to understand the causes and impacts of disasters on environment. |
| CO3 | Students are able to learn about risk reduction approaches of disasters with safety issues in mitigating industrial disasters. |
| CO4 | To understand the concept of Disaster Management Cycle and its Risk Reduction. |
| CO5 | Students are able to learn role of Disaster Management Act, NDRF for Disaster Management. |

| Unit No. | Title of the Unit | Content of Unit | Contact Hrs. | Mapped CO | | | | |
|---|---|--|-----------------|--------------|--|--|--|--|
| 1 | Introduction to Disaster | Introduction to Disasters, Concepts, Definition and types (Natural and Man-made), Disaster profile of India. | 08 | CO1 | | | | |
| 2 | Impact of Disaster | Causes and Impacts of Disasters, Global and National Perspective, Case studies from Disasters, Large Hydro projects and its risks for Disasters. | 08 | CO2 | | | | |
| 3 | Disaster Risk Reduction | Approaches to Disaster risk Reduction, Safety issues in mitigating Industrial disasters, Case studies, EHS etc. | 08 | CO3 | | | | |
| 4 | 4 Disaster Disaster Management Cycle, Risk Reduction Measures (Preparedness, Mitigation, Response Reconstruction and Rehabilitation etc.) | | | | | | | |
| 5 | Disaster Act. and Policies | Disaster Act. and Disaster Bole of International/National Humanitarian aid/ Relief Organizations for | | | | | | |

Loyalty. Intended to develop a set of beliefs, attitude | es, an | id ha | bits (| that |

| | Course Outcomes |
|-----|--|
| CO1 | Know about the concepts of database, their types, design concepts and ER-models. |
| CO2 | Know about the concepts of relational databases, working with SQL for frontend development. |
| CO3 | Know about the concepts of query optimization, transaction processing and concurrency control. |
| CO4 | Know about the concepts of database technologies, distributed database environment. |
| CO5 | Know about the concept of data warehouse, data cleaning and data integration. |

| Unit No. | Title of the Unit | Content of Unit | Contact Hrs. | Mapped CO | | | |
|-------------|--|---|-----------------|--------------|--|--|--|
| 1 | Human Value Education | Understanding the need, basic guidelines, content and process for Value Education, Self Exploration - Its content and process; 'Natural Acceptance' and Experiential Validation- as the mechanism for self exploration, Continuous Happiness and Prosperity- A look at basic Human Aspirations, Right understanding, Relationship and Physical Facilities- the basic requirements for fulfillment of aspirations of every human being with their correct priority, Understanding Happiness and Prosperity correctly. | 08 | CO1 | | | |
| 2 | Introduction to Ethical Concept | Ethical Concept Value Judgments. Moral Rights and Moral rules, Moral character and responsibilities. Privacy, Confidentiality, Intellectual Property and the Law. Ethics as Law. | | | | | |
| 3 | 3 Professional Responsibility The basis and scope of Professional Responsibility, Professions and Norms of Autonomy of professions and codes of ethics. Employee status and Professionalism. Central Professional Responsibilities of Engineers: The emerging consensus on the Responsibility for safety among engineers, hazards and risks. | | | | | | |
| 4 | Engineers Ethics | Senses of 'Engineering Ethics' - variety of moral issues - types of inquiry - moral dilemmas - moral autonomy - Kohlberg's theory - Gilligan's theory - consensus and controversy – Models of Professional Roles- theories about right action - Self-interest - customs and religion - uses of ethical theories. Valuing Time – Co- operation – Commitment | 08 | CO4 | | | |
| 5 | Global Issues | A Glimpse of Life Stories: Life story of Prophet Mohammad, Mahatma Gandhi, Swami Vivekananda, Marie Curie and Steve Jobs. Multinational corporations - Environmental ethics - computer ethics - weapons development - engineers as managers-consulting engineers-engineers as expert witnesses and advisors - moral leadership | 08 | CO5 | | | |

| Year | II | Semester | IV | 0 | 0 | 2 | 1 | | | | | |
| Pre-Requisite | NIL | Co-requisite | CE209 | | | | | | | | | |
| Course Objectives | Students are expected to hand on experience with different hydraulic machine. Also understand characteristics of flow and hydraulic machines | | | | | | | | | | | |

| | Course Outcomes |
|-----|---|
| CO1 | Students are able to learn to find the Manning's coefficient of roughness 'n' for the bed of a given flume. |
| CO2 | Students are able to learn to study the velocity distribution in an open channel and to determine the energy and momentum correction factors. |
| CO3 | Students are able to learn the rot dynamic pumps and their characteristics. |
| CO4 | Students are able to calibrate a sharp-crested rectangular and triangular weirs. |
| CO5 | Students are able to learn the characteristics of free hydraulic jump. |
| CO6 | Students are able to learn the flow characteristics over a hump placed in an open channel. |

| Unit No. | Title of the Unit | Content of Unit | Contact Hrs. | Mapped CO | | | |
|-------------|-----------------------|--|-----------------|--------------|--|--|--|
| 1 | Experiment -1 | To determine the Manning's coefficient of roughness 'n' for the bed of a given flume. | 02 | 1 | | | |
| 2 | Experiment-2 | To study the velocity distribution in an open channel and to determine the energy and momentum correction factors. | 02 | 1 | | | |
| 3 | Experiment-3 | To study the flow characteristics over a hump placed in an open channel. | 02 | 2, 6 | | | |
| 4 | Experiment-4 | To study the flow through a horizontal contraction in a rectangular channel. | 02 | 2 | | | |
| 5 | Experiment-5 | To calibrate a sharp-crested rectangular and triangular weirs. | 02 | 3 | | | |
| 6 | Experiment-6 | Experiment-6 To calibrate a broad-crested weir and study the pressure distribution on the upstream face of the weir. | | | | | |
| 7 | Experiment-7 | To calibrate a Venturiflume. | 02 | 4 | | | |
| 8 | Experiment-8 | To study the characteristics of free hydraulic jump. | 02 | 4, 5 | | | |
| 9 | Experiment-9 | To study the flow over a free overfall in an open channel and to determine the end depth. | 02 | 6 | | | |
| 10 | Experiment-10 | To study rotodynamic pumps and their characteristics. | 02 | 3 | | | |
| 11 | Experiment-11 | To study rotodynamic turbines and their characteristics | 02 | 5 | | | |
