Effective from Session	: 2022-23												
Course Code	FS113	Title of the Course	BASICS OF FORENSIC SCIENCE	L	Т	Р	С						
Year	Ι	Semester	Ι	2	1	0	3						
Pre-Requisite	Nil	Co-requisite	Nil										
Course Objectives	The objective is t	o introduce the students to	forensic science and give a brief idea about the history and	develo	pments	of the							
Course Objectives	field, related laws	objective is to introduce the students to forensic science and give a brief idea about the history and developments of the d, related laws & ethics, and organizational structure of forensic science laboratories.											

	Course Outcomes
CO1	Students will have abundant knowledge and understanding about the types, nature & characteristics of crime and will be able to discuss the
	present scenario of crime in India.
CO2	Students will be able to understand the terminologies used in criminal proceedings and will be able to classify different types of crime and
	objects of punishments.
CO3	Students will have abundant knowledge about the history and development of the forensic science and its principles, Specific contribution of
	Scientists in the field of Forensic Science.
CO4	Students will have abundant knowledge at the end of the course. Familiarize oneself with the organization of a forensic science laboratory.
CO5	Students will be able to understand the ethical role and responsibilities of a forensic expert.

Unit No.	Title of the Unit	Content of Unit	Contact Hrs.	Mapped CO
1	CRIME SCENARIO IN INDIA	 Introduction to crime and history, Sociological aspects of crime and criminals in society. Types of crime and its causes – property crimes, public order crimes, violent crimes, cyber-crimes, juvenile delinquency. Society-Criminal interaction and various types of crimes in India. Criminal behavior - Theories and literature studies, criminal inheritance, and factors responsible. 	6	CO1
2	CRIMINOLOGY & LAW	 Definition of law, court, judge, Basic terminologies in law. Law to combat crime, classification of civil & criminal cases, the difference between civil & criminal cases. Essential elements of criminal law. The object of punishment, kind of punishment. 	6	CO2
3	DEVELOPMENTAL GROWTH OF FORENSIC SCIENCE	 Introduction to Forensic science – nature, need, and function. Laws and Principles, basics of Forensic Science. Historical development and scope of Forensic Science in India. Specific contribution of scientists in the field of forensic science. 	6	CO3
4	FORENSIC SCIENCE LABORATORIES AND FACILITIES	 Organizational setup of the forensic science lab and other national & international agencies: - FSL, CFSL, GEQD, NICFS, CID, CBI, Central Detective Training Schools, NCRB, NPA (National Police Academy). Services and functionalities provided by various FSLs. Various divisions in the FSL – Ballistics, Biology, Chemistry Documents, Physics, Psychology, Serology, Toxicology. 	6	CO4
5	FORENSIC ETHICS	Forensic Ethics- Introduction, Definition, Scope, Ethics in Forensic Science, Professionalism, and ethics: Importance of professional ethics, the importance of professional ethics to science practitioners, development of code of conduct and code of ethics for Forensic Science; Application of codes and ethics, how ethical requirements impact the daily work of a forensic scientist; Ethical dilemmas and their resolution.	6	CO5

Course Objectives							

	Course Outcomes
CO1	After studying this the students will have the basic understanding of definitions and terminologies used in legal proceedings.
CO2	After completing this the students will have the basic understanding of law to combat crime.
CO3	After studying this course, the students will know the Acts and provisions of the Constitution of India related to forensic science and specific
	sections of IPC, IEA & CrPC.
CO4	The students will understand the police organization setup and their functions.
CO5	After studying the students will know about the Acts governing socio-economic crimes and environmental crimes.

Unit No.	Title of the Unit	Content of Unit	Contact Hrs.	Mapped CO
1	DEFINITIONS OF LAW	<u>Definitions-</u> of Law, Court, Judge, Basic Terminology in Law, Introduction to Criminal Procedure Code, FIR, Difference between civil and Criminal Justice, Object of Punishment, Kinds of Punishment.	6	CO1
2	LAW TO COMBAT CRIME	Law to Combat Crime- law. Constitution and hierarchy of criminal courts. Criminal Procedure Code. Cognizable and non-cognizable offenses. Bailable and non-bailable offenses. Sentences which the court of Chief Judicial Magistrate may pass.	6	CO2
3	LAWS SPECIFIC TO FORENSIC SCIENCE	Laws specific to Forensic Science: <u>Indian Penal Code</u> : pertaining to offences against persons – Sections 121A, 299, 300, 302, 304A, 304B, 307, 309, 319, 320, 324, 326, 351,354, 359, 362.Sections 375 & 377 and their amendments. <u>Indian Evidence Act–</u> Evidence and rules of relevancy in brief. Expert witness. Cross- examination and re-examination of witnesses. Sections 32, 45, 46, 47, 57, 58, 60, 73,135, 136, 137, 138, 141. <u>CrPC–</u> Sections 291,291A, 292 & 293 in the code of criminal procedure.	6	CO3
4	POLICE SCIENCE	Police science: definition and scope-Police organization under central government: general information about their structure and function BPR&D, CBI, IB, RAW, NCRB, NICFS, NPA, UT Police Force. <u>International Police Organization</u> : INTERPOL- history, structure general and special notices. <u>State Police organization</u> : general organization of police at the state and range level. Police organization at the district level.	6	CO4
5	ACTS IN FORENSIC SCIENCES	Acts Pertaining to Socio-economic and Environmental Crimes. Dowry Prohibition Act. Immoral Traffic Prevention Act. Wildlife Protection Act. Environment Protection Act. Untouchability Offences Act.	6	CO5

Course Code	LN101	Title of the Course	BASICS OF PROFESSIONAL COMMUNICATION	L	Т	Р	C
Year	Ι	Semester	I	2	1	0	3
Pre-Requisite	Nil	Co-requisite	Nil				
Course Objectives	The major	objective of the course	is to develop professional communication skills among the	stude	nts.		

	Course Outcomes
CO1	After studying this course, the students will know the meaning & importance of professional communication as well as effective professional
	communication.
CO2	After studying this course, the students will understand the language through literature like essays and short stories.
CO3	After studying this course, the students will know the basic concepts and knowledge of vocabulary.
CO4	After studying this course, the students will have the understanding and practice of basic grammar.
CO5	After completion of this course, the students will have the knowledge, understanding, and skills in report writing & business letter writing.

Year	Ι	I Semester II 3 1 0 4											
Pre-Requisite	Nil	Co-requisite	Nil										
Course Objectives	The main objective of the course is to develop an understanding of sound, optics, laser, and electronic circuits.												
			-										

	Course Outcomes							
CO1	To understand the sound and its various aspects.							
CO2	Understand optics and their dimensions.							
CO3	Able to demonstrate types and properties of laser & fiber optics.							
CO4	Will be able to demonstrate X-rays and their aspects.							
CO5	Understand the basic concepts of electronic circuits & digital electronics.							

Unit No.	Title of the Unit	Content of Unit	Contact Hrs.	Mapped CO
1	STUDY OF SOUND	 Velocity of sound, noise and sound intensity measurement, echo, reverberation, Sabine's Formula, absorption coefficient, the acoustics of buildings, and factors affecting the acoustics of buildings. Sound distribution in an auditorium, introduction to ultrasonic, production of ultrasonic waves, applications of ultrasonic. 	8	CO1
2	OPTICS	 Interference: Coherent sources, conditions of interference, Fresnel's bi-prism experiment, interference in thin films, wedge-shaped film, Newton's ring. Diffraction: Single slit and double slit diffraction, diffraction grating, Raleigh's criterion of the limit resolution, resolving power of telescope and microscope. Polarization: Polarization of light, Brewster's law, Malus law, the phenomenon of double refraction, the geometry of calcite crystal, optic axis, principal section, ordinary and extraordinary rays, construction and working of Nicol prism. Plane circularly and elliptically polarized light, Their production, and analysis. Retardation Plates, optical activity, specific rotation, polarimeters. 	8	CO2
3	LASER & FIBER OPTICS	 To understand the sound and its various aspects. Understand optics and their dimensions. Able to demonstrate types and properties of laser & fiber optics. Will be able to demonstrate X-rays and their aspects. Understand the basic concepts of electronic circuits & digital electronics. 	8	CO3
4	X-Rays	Origin of X-rays, continuous and characteristic X-ray spectra, Mosley's law, absorption of X-rays, Diffraction of X-rays, Bragg's law, Bragg's spectrometer, practical applications of X-ray, X-ray Machine.	8	CO4
5	ELECTRONICS CIRCUITS & DIGITAL ELECTRONICS	Basics of LR, CR, LCR circuits, Rectifier circuits, Timer circuits, Transistor and its characteristics, Introduction to OPAM, remote sensing and controlling, Photosensors, Logic gates, and their applications, Flip-flops and counters.	8	CO5

Course Objectives	The Objective of th	The Objective of this course is to introduce the students to recent trends and newly introduced technologies in the field of									
forensic science so that they can understand and fulfill the requirements of the field.											

	Course Outcomes						
CO1	Understanding the concept of digital vehicle forensics.						
CO2	Understanding biosensors and their forensic application.						
CO3	3 Understanding the concepts of drone forensic.						
CO4	Understanding the block chain technology.						
CO5	Understanding the Immunochromatography and forensic application.						

Unit No.	Title of the Unit	Content of Unit	Contact Hrs.	Mapped CO					
1	DIGITAL VEHICLE FORENSICS	Driverless cars, wealth of digital information, such as recent destinations, favorite locations, routes, and personal data (e.g., call logs, contact lists, SMS messages, pictures, and videos).	6	CO1					
2	BIOSENSORS	Introduction to biosensor technology, Prostate-specific antigen (PSA) detection in forensic samples: Miniaturization of Surface Plasmon Resonance (SPR) Immunosensors: Multi-Metal-Deposition, Detection of Microbial Biosensors: Chemical Sensors.	6	CO2					
3	DRONE FORENSIC	Introduction to drone technology, Threats imposed by Drones, Electronic Configurations of Drones, Architectural Efficiency of Drones, Drone Controllers, Digital Evidence, Flight Log File Analysis, Data Storage Analysis, Case Study on Criminal Usage of Drones.	6	CO3					
4	BLOCK CHAIN- BASED SOLUTIONS	What are cryptocurrencies, Public vs. private block chain technology, Proof of work (vs. proof of scale), What is Bitcoin? vs Bitcoin cash? Cloud forensic, IOT. Types of Evidence in Cloud of Things.	6	CO4					
5	IMMUNOCHROMAT OGRAPHY	Introduction, theory, Procedure and forensic application.	6	CO5

	CHEMISTRY-II			√					3,4, 11

Effecti	ve from Sessi	on:2023-2024													
Course	e Code	LN131	Title of the Course	Effective Communication and Media Studies in English	L	Т	Р	С							
Year		Ι	Semester	Π	2	1	0	3							
Pre-Re	equisite	10+2	Co-requisite	UG											
	The students will be able to:														
Course	• Developing the art of communication and learning basic skills of conversation														
	• Knowledge of Professional and Media Skill Development, Career enhancement tips and goal-oriented learning.														
Object	 Basic concept of Phonetics, Voice and Accent. 														
		Students w	ill learn academic learnii	ng and descriptive writing.											
				Course Outcomes											
CO1	Students will	be able to develo	p Formal and Informal Spo	oken skills, learn career development skills and learn to have clear idea of go	al settir	ng.									
CO2	Students will	learn about the in	nportance and usage of ma	ass media and ways to develop their media skills.											
CO3	Academic Wr	iting will help st	udents to format and struct	ure the content they create which will help them to be professional writers ar	nd blogg	gers.									
CO4	The unit will help students to learn and develop better conversation skills in formal and informal setup. They will learn the proper usage and pronunciation in														
	various accent enabling them to converse in competitive environment.														
CO5	The unit enab	les students to pu	it all the theoretical knowle	edge to practice, assuring complete learning and implementation.											

Title of the Unit	Content of Unit	Contact Hrs.	Mapped CO
Communication in Practice	Do's and Don'ts of Formal and Informal Communication Tips on Career Management- Setting Clear Goals, Skill Development, Network Building and Professional Relationship Etiquette, Knowing Aptitude and Values. Classroom Practice- JAM (Just A Minute) Extempore, Rebuttal, Forum, Role Play.	7hrs	CO1
Mass Communication and Journalism	Introduction to Mass Communication. Types of Mass Communication/ Mass Media Impact of Globalization on Mass Media Socio Political Impact of Digital Media Advertisement- Ethical and Unethical Advertisement, Jingles, Tag Lines, Punch Lines, Media Writing	7hrs	CO2
Fundamentals of Academic Writing	The four main types of academic writing- Descriptive, Analytical, Persuasive and Critical. Writing Book Review, Introduction to Descriptive Writing Techniques and Features of Descriptive Writing - Character, Place and Travel Description, Event, Movie and Food description.	7hrs	CO3
Conversation Skills	 Phonetics- Learning Speech Mechanism (Voice and Accent) Introduction- Self and Other-Guest Speaker / Colleague Polite Conversational Etiquette Varieties of English Language; their difference in terms of Pronunciation, Vocabulary and Spelling: British -American 	7hrs	CO4
Academic Project	 Creating News Bytes Writing News Report Creating Jingles and Tag Lines for Famous Brands. Writing Editorial on a Topical Subject Writing Film Reviews Travelogue 	4hrs	CO5

Course Objectives														

	Course Outcomes
CO1	To perform the examination of blood groups.
CO2	To perform the physical and chemical examination of body fluids.
CO3	To conduct the isolation of chromosomal DNA.
CO4	To perform the chromatography to separate the amino acids, sugars, and lipids.
CO5	To isoloate the DNA from different cells.

Unit No.	Title of the Unit	Content of Unit	Contact Hrs.	Mapped CO
1	1. Antigen-Antibody reaction (Blood Groupings)		
2	2. Study of body Cavity fluids	(Physical & Chemical Examination)		
3	3. Isolation of Chromosomal D	NA		
4	4. Chromatography- Separatio Chromatography. Determine	n of Amino acids, sugars, lipids using Paper chromatography and thin layer RF values	30 hrs.	CO1-5
5	 5. Isolation of DNA From: a. Bacterial Cells b. Animal Cells c. Plant Cells

Course Code	FS127	Title of the Course	CRIME SCENE INVESTIGATION-LAB	L	Т	Р	С							
Year	Ι	Semester	П	0	0	2	1							
Pre-Requisite	Nil	Co-requisite	Nil											
Course Objectives														

	Course Outcomes: After the successful course completion, learners will develop following attributes:
CO1	Students will be able to perform the crime scene investigation of homicide and suicide crime scenes.
CO2	Students will be able to perform the crime scene investigation of road accidents and hit-and-run crime scene.
CO3	Students will be able to perform the crime scene investigation of hanging cases.
CO4	Students will be able to perform the crime scene processing and forwarding of physical evidences pertaining to various criminal
	cases.
COS	Students will be able to give the court testimony of expert evidences in different types of eximes

CO5 Students will be able to give the court testimony of expert evidences in different types of crimes.

Unit No.	Title of the Unit	Content of Unit	Contact Hrs.	Mapped CO
1	CRIME	To perform mock homicide crime scene investigation.		
2	CRIME SCENE	To perform mock suicide crime scene investigation.		
3	INVESTIGATION	To perform mock hit-and-run crime scene investigation.		
4	STAGES IN CSI	To perform mock hanging crime scene investigation.	30 hrs.	CO1-5
5	PHYSICAL EVIDENCE	Searching, Collection, packaging, preservation, handling, and forwarding of Physical evidences in different crimes.	50 ms.	01-5
6	INVESTIGATIVE TECHNIQUES	To perform mock court testimony of expert evidences in different types of crimes.
