Effective from Session: 2025-26							
Course Code	SS413	Title of the Course	Sociological Theories	L	T	P	C
Year	Ist	Semester	Ist	4	0	0	4
Pre-Requisite	Graduation	Co-requisite	None				
Course Objectives	This course is intended to provide knowledge to the students regarding various sociological theories which is going to help student in various competitive exams						

Course Outcomes	
CO1	Explain about development of sociology in the 19th century and role of French and Industrial revolution
CO2	Learn briefly about Karl Marx Capitalism Class Conflict etc.
CO3	Provide information about Marx Weber theory
CO4	Enhance knowledge regarding Emile Durkheim contribution of different theories
CO5	Justify and explain different theories given by Herbert Spencer
CO6	Enhance knowledge regarding Vilfredo Pareto contribution of different theories
CO7	Justify and explain different theories given by Thurstein Veblen
CO8	Enhance knowledge regarding George Simmel contribution of different theories

Unit No.	Title of the Unit	Content of Unit	Contact Hrs.	Mapped CO
1	Sociology in 19th century	The Development of sociology in the 19th century Role of French and Industrial revolution	5	CO1
2	Karl Marx	Transition from pre capitalist to capitalist social formation, Capitalism and class conflict	5	CO2
3	Max Weber	Social Action, Ideal Types, Religion and Social change	5	CO3
4	Emile Durkheim	Social Fact, The Division of Labor, Suicide and Religion	5	CO4
5	Herbert Spencer	Organic Analogy, Social Evolution and Social Darwinism	5	CO5
6	Vilfredo Pareto	The Theory of the Circulation of Elites, Pareto's Concept of "Residual" and "Derivative" Trait, Social Action	5	CO6
7	Thurstein Veblen	Theory of Leisure class, Theory of social Change	5	CO7
8	George Simmel	The Relationship Between the Individual and Society, Social Forms and the Interaction Process, The Philosophy of Money	5	CO8

Effective from Session: 2025-26							
Course Code	A070703T/ SS415	Title of the Course	Social Demography	L	T	P	C
Year	Ist	Semester	Ist	4	0	0	4
Pre-Requisite	Graduation	Co-requisite	None				
Course Objectives	This course provides a comprehensive survey of the field of social demography the scientific study of population. The course begins by focusing on understanding the core social demographic variables (e.g., fertility, mortality, morbidity, migration), and how these variables influence population growth, composition, and structure. Population will be examined in relation to its sociological determinants and consequences.						

Course Outcomes	
CO1	Understand the foundational concepts of social demography and Evaluate the interdisciplinary relevance and importance.
CO2	Critically evaluate classical and transition theories of population growth and their relevance in modern contexts.
CO3	Analyze the socio-economic and cultural determinants of fertility and mortality using demographic indicators.
CO4	Examine the patterns and classifications of migration and assess their demographic and sociological impacts.
CO5	Interpret public health data and understand morbidity and reproductive health in relation to population dynamics.
CO6	Examine neo-classical and modern economic-demographic theories to explain population behavior and fertility.
CO7	Evaluate sources and methods of population data collection and understand projection techniques and limitations.
CO8	Assess the factors behind rapid population growth and its implications for economic development and planning.

Unit No.	Title of the Unit	Content of Unit	Contact Hrs.	Mapped CO
1	Introduction	Social Demography: Definition, Nature and Scope, Relation of with other social Sciences, Importance.	5	1
2	Theories	Malthus' Theory of Population ,Theory of Demographic transition	5	2
3	Demographic Process	Fertility: Concept and Measurement, factors Mortality: Concept and Measurement, factors	5	3
4	Migration	Definition and meaning of migration, Classification: Internal (rural-rural, rural-urban, urban-rural, urban-urban)	5	4
5	Morbidity, Public Health,	Concepts of morbidity , Public health indicators and their sociological implications,	5	5
6	Neo-Classical and Modern Demographic Theories	Neo-classical theories: Sadler, Doubleday, Modern theories: Becker's theory,	5	6
7	Indian Population	Sources of Population Data: Census, Registration method,	5	7
8	Population Growth	Factors Responsible for Rapid Population Growth,Effects of Over population,	5	8

Course Code	IIM402	Title of the Course	Advanced Research Methodology	L	T	P	C
Year	IV	Semester	VIII	4	0	0	4
Pre-Requisite	10+2	Co-requisite					
Course Objectives	The course aims to equip students with a comprehensive knowledge of research methods, from design and data collection to analysis and reporting. It develops critical thinking, ethical awareness, and practical research skills for academic and applied contexts.						
Course Outcomes							
CO1	Given foundational concepts, students will describe the types, process, and ethics of research for effective problem identification and formulation						
CO2	Using academic sources, students will perform literature reviews, identify research gaps, and construct testable hypotheses.						
CO3	Given research objectives, students will design studies using appropriate sampling methods to ensure validity and representativeness						
CO4	Using structured tools, students will collect valid and reliable data through questionnaires, interviews, and observations						
CO5	Given scaling methods, students will classify data levels and apply appropriate techniques to minimize measurement errors.						
CO6	Using software tools (Excel/SPSS), students will process, tabulate, and present descriptive data through appropriate graphical and statistical summaries.						
CO7	With statistical tools, students will conduct hypothesis testing using t-tests, chi-square, ANOVA, and interpret regression and correlation results						
CO8	Students will prepare ethically compliant research reports and proposals using correct structure, citation styles, and anti-plagiarism norms						

Unit No.		Content of Unit	Contact Hrs.	Mapped CO
1	Introduction to Research	Meaning, Objectives, and Characteristics of Research, Types of Research: Basic, Applied, Descriptive, Analytical, Experimental, Research Process and Formulation of Research Problem, Ethical Considerations in Research	05	CO1
2	Review of Literature and Hypothesis Formulation	Need and Importance of Literature Review, Sources of Literature: Primary and Secondary, Identification of Research Gaps, Formulation of Hypotheses: Types and Characteristics	05	CO2
3	Research Design and Sampling	Meaning and Types of Research Design, Components of a Good Research Design, Population and Sample, Sampling Techniques: Probability and Non-Probability Sampling	05	CO3

Effective from Session: 2025-2026							
Course Code	A070804T/SS421	Title of the Course	Sociology of Development	L	T	P	C
Year	Ist	Semester	IIInd	4	0	0	4
Pre-Requisite	Graduation	Co-requisite	None				
Course Objectives	The course offers a broad overview of the conceptualization of development and different perspectives that emerged in specific historical and political conditions. The debates on development will provide the better understanding of the recent issues in the area.						

Course Outcomes	
CO1	Analyze core concepts such as development, modernization, underdevelopment, and sustainability to critically engage with foundational debates in the sociology of development
CO2	Evaluate classical development theories by Weber, Myrdal, and Lerner in their historical-political contexts and assess their relevance to contemporary development issues
CO3	Compare and critique modern and dependency theories (Frank, Amin, Wallerstein, Rostow) and construct arguments on global inequality and power structures
CO4	Examine the intersections between development and socio-economic disparities, particularly with respect to gender, marginalized groups, and agrarian movements
CO5	Assess key contemporary concerns in development such as food security, healthcare, poverty, and sustainable agriculture from a sociological lens
CO6	Critically appraise the impacts of globalization and neoliberal policies on environmental and social development, with a focus on the crisis of development
CO7	Synthesize major developmental issues in India such as displacement, planning, and market-driven reforms by examining policy shifts since liberalization
CO8	Design a critical evaluation of public policies and social sector interventions in India, highlighting challenges in implementation and equity outcomes

Unit No.	Title of the Unit	Content of Unit	Contact Hrs.	Mapped CO
1	Basic Concepts	Introduction to Sociology of Development, Growth, progress, modernization, development, underdevelopment, human development and HDI, social development, sustainable development	08	C01
