Effective from Session: 2025-26							
Course Code	A070703T/SS415	Title of the Course	Social Demography	L	T	P	C
Year	IVth	Semester	VIIth	4	0	0	4
Pre-Requisite		Co-requisite	None				
Course Objectives	This course provides a comprehensive survey of the field of social demography the scientific study of population. The course begins by focusing on understanding the core social demographic variables (e.g., fertility, mortality, morbidity, migration), and how these variables influence population growth, composition, and structure. Population will be examined in relation to its sociological determinants and consequences.						

Course Outcomes	
C01	Understand the foundational concepts of social demography and Evaluate the interdisciplinary relevance and importance.
C02	Critically evaluate classical and transition theories of population growth and their relevance in modern contexts.
C03	Analyze the socio-economic and cultural determinants of fertility and mortality using demographic indicators.
C04	Examine the patterns and classifications of migration and assess their demographic and sociological impacts.
C05	Interpret public health data and understand morbidity and reproductive health in relation to population dynamics.
C06	Examine neo-classical and modern economic-demographic theories to explain population behavior and fertility.
C07	Evaluate sources and methods of population data collection and understand projection techniques and limitations.
C08	Assess the factors behind rapid population growth and its implications for economic development and planning.
