12. LIST OF TABLES AND FIGURES- These will be two separate lists on different pages. List of tables will be first followed by list of figures. The lists should include exactly the same titles and legends as they appear in the respective tables and figures used within the text in the thesis. Page numbers on which they appear should be mentioned in the list. Spacing of 1.5 and font size 12 should be adopted while typing the matter under these heads.

13. LIST OF SYMBOLS, ABBREVIATIONS, NOMENCLATURE ETC. - Spacing of 1.5 should be adopted while preparing this list. Standard symbols, abbreviations and nomenclature etc. should be used. Abbreviations in the text should be mentioned on their first appearance and properly explained.

14. CHAPTERS –Apart from the introductory chapter, the main body of the thesis may have any number of relevant chapters properly numbered. Unnecessary chapters should not be included just to increase the number of pages in the thesis. As far as possible, the desired number of pages as mentioned earlier should be adhered to. To put the point across; crisp headings, division headings and sub-headings should be used. The main text should be divided into several chapters based on the aims and objectives. Each chapter should be given appropriate title and sub –titles wherever necessary like; short introduction related to the chapters, material and method, results, discussion and conclusion. The tables and figures in a chapter should be included using single space and placed in the same page as the concerned material, directly underneath the matter to which they refer or describe. Chapter 1 (Introduction and Review of literature including hypothesis, aims, objectives and significance); Chapter 2, 3, 4..... (Introduction, material and methods, results, discussion and conclusion) shall be the standard format for each chapter. The word CHAPTER (font size 14 bold) should be centered 50 mm down from the top of the page. Two spaces below, the title should be typed centrally in capital letters. The text should commence on next page. The division and sub-division captions along with their numberings should be tabbed and formatted as specified above. The typed material should commence 2 spaces below the division or sub-

division headings. Within a division or sub-division paragraphs are permitted. The paragraphs should commence 3 spaces below the last line of the preceding paragraph and should be suitably indented from the left hand margin. Alignment of the text/paragraphs should be 'justified' throughout the thesis. The numbering of chapters should be done using Arabic numerals only and further decimal notations should be used for numbering the divisions and sub-divisions within a chapter. (Specimen copy is attached as *Annexure-Va*).

15. TABLES & FIGURES – The word table in this context means the tabulated numerical data included in the thesis as well as appendices and all diagrammatical material such as charts, pictures, graphs, maps, photographs and diagrams may be designated as figures.

Tables and figures appearing anywhere in the thesis should bear captions and appropriate numbers in font size 12 and bold. If four figures happen to be in chapter 3, then the numbering will be as Figure 3.1, Figure 3.2 and so on. The numbering on the table will also follow the same pattern as Table 1.6, Table 4.2 etc. within chapters 1 and 4, respectively. They would be written as Table (AII.1), Table (AIII.4) if tables appear in Appendix –II & III of the thesis. Same rule will apply for figures in Appendices.

- A table or figure including the caption should be accommodated within the prescribed margin limits and appear on the page or after the page (if the table or figure cannot be adjusted on the same page) where their first reference is made.
- Footnotes should be used sparingly. They should be typed using single spacing and placed in the very same page which refers to the material they explain.
- Tables and figures on half a page or less in length may appear along with the text. However, they should be separated from the text both above and below by triple spacing. Two or more small tables or figures may also be grouped on a single page.
- All tables and figures should be prepared on the same paper used for the preparation of the rest of the thesis.
- Captions should be placed above the tables and below in/case of figures. No figure or table should be included in the thesis without a proper caption legend. Captions should be self-explanatory to the extent possible.
- Samples of fabric, leather, etc. if absolutely necessary, may be fixed/ pasted properly on a page and should be treated as figures.

Important: - Copyright permission shall be enclosed for the tables/figures reproduced from the published articles, reviews and books.

16. EQUATIONS – Any equations appearing in the chapters or appendix should also be numbered serially. For example, an equation appearing in chapter-6 and it happens to be the eighth equation in that

chapter; it should be numbered as Eq. (6.8). Similarly, while referring to 3rd equation in Appendix –II it would be typed Eq. (AII.3).

17. REFERENCE CITATIONS IN TEXT– APA utilizes a system of brief referencing in the text of a paper, whether one is paraphrasing or providing a direct quotation from another author’s work. Citations in the text usually consist of the name of the author(s) and the year of publication.

- **Indirect Quotation with Parenthetical Citation**
