

INTEGRAL UNIVERSITY
DEPARTMENT OF CIVIL ENGINEERING
COMPUTER AIDED DESIGN LABORATORY

For the advantage of civil engineering students, a well-equipped computer lab with modern facilities has been constructed. Among them are high-end terminals with the most up-to-date hardware and software, as well as the most up-to-date software's such as STADD-Pro, AutoCAD, Python IDE's etc. Advanced civil engineering software are installed to help students become more globally competitive and industry-ready. Students learn professional 2D and 3D drafting, computer-aided design and lay-outing in civil engineering works developing necessary skills for the civil engineering profession. The CADD lab is equipped with 60 computers and latest ICT facility accompanied with dedicated LAN @100 mbps.
